UNDERWRITING MADE EASY

CREDIT PACKAGE AUTOMATION

Streamline how everyone in the organization reviews each transaction. Use automation to compile intel from third-party data providers into a PDF application credit package for each financing transaction.

VENDOR PROFILE ANALYSIS

Some equipment vendors and referral sources have better track records than others. Evaluate vendor performance with key metrics including delinquency rate, default history, existing exposure, origination volume, average credit score, profitability and more.

VIRTUAL SIGNATURES

Stop waiting for snail mail to get your paperwork across the finish line. Expedite closing your deals by integrating eDocuments and eSignatures into your application and funding process.

DEAL VERSIONING

Auto calculate varying term sets in real time all while preserving each historical term set version as a deal progresses. This allows Credit, Sales and management see the evolution of the negotiated deal.

Why You Should Work With Us

SECURITY

We take security seriously. Our entire staff take routine security and secure code training in addition to security monitoring. Our code goes through static and dynamic code analysis that is built into our SDLC and penetration testing to ensure the highest quality is met.

COMPETITIVE

With offices in the US and overseas, we are able to lower your costs by leveraging the global marketplace. We don't outsource, rather we have invested heavily in global services so we can provide the same service at lower costs.

PARTNERSHIP

Our business process automation software is not only used in the equipment leasing industry but also by millions of our client's customers across the globe in a diverse host of business applications. Our clients have improved their workflow efficiencies substantially by using technology that we've developed and continue to maintain and enhance on a regular basis.
